

**Prior self-evolving methods:  
fragments into a fixed scaffold**

**a code patch**

```
{"add_code_hook": {  
  "on_init": ...,  
  "on_before_action": ...}}  
# hooks over a FIXED agent
```

their entire output  
≈ one component type

**a skill / prompt snippet**

Try step functions first;  
restart when stalled.  
# advice, not machinery

*prompt, tools, config stay fixed*

**Ours: the proposer generates the complete harness  $H_k$**
